Breakfast Briefing

Time to consider using Messenger Marketing as part of your marketing mix?

You're probably wondering "why would I/my business website need to use a Chatbot and what is it?"

It is through having conversations with our customers that we get to know them and can serve them in the way that they need, whilst building a relationship with them.

Truly understanding your customer and meeting your customer where they're at is a key cornerstone of modern business today that can't be stressed enough.

The use of Chatbot's, otherwise referred to as Messenger Bots, is a step closer to achieving this ideal scenario of being able to truly connect with your customer at the time that they need you most and at the time that they are actively seeking you. The problem is that in the past this has not been possible, but now small businesses are able to perform this on a more feasible level for 24 hours a day, 7 days each week.

Did you know that:

20 billion+ messages exchanged between businesses and users every month.

40 million+ businesses use Messenger every month.

Plus Messenger Marketing delivers 80% open rates and 20% CTRs.

Come and join us over an informal networking breakfast and hear from experienced speaker Caroline Sumners who will share how messenger marketing could transform your business.
