

Advanced contract	Our team can quote 12 months in advance of your renewal date, and in cases of larger energy users this may be longer. This allows a business to gain an insight into current pricing in the energy market and can help with budget planning.
Bill analysis	As part of the Chamber Energy Solutions procurement service, we will conduct a full analysis on your previous bills. This includes checking your renewal date to avoid extension into out of contract rates, your kVa supply, CCL charge, type of meter, VAT and amalgamation of sites into one contract if required. With your authority we can also liaise directly with the supplier on your behalf to gain renewal rates and search the market for alternative supply agreements.
Bill auditing	Our team can check all your historical bills for discrepancies up to 6 years old.
Budget portfolio deal	Budget Portfolio offers smaller clients the benefits of large-scale purchasing power, but while still retaining the security of a fixed-rate contract arrangement. There is no minimum volume requirement for individual clients and a maximum annual consumption volume per client of 6GWh. But to qualify for Budget Portfolio, you must aggregate your nominated clients into one or more purchasing groups with a collective minimum annual volume of 6GWh. Contracts can then be offered for 24 months.
Carbon footprint	The amount of carbon dioxide released into the atmosphere as a result of the activities of a particular individual, organization, or community.
Carbon Zero service	An opportunity for Chamber members to become carbon neutral, by offsetting gas and electricity usage through Chamber Energy Solutions.
CCL charge	Tax in applied in the UK on the business use of energy that was implemented April 2001. The GB levy applies to gas, electricity, coal and LPG, but not oil. Rates can be changed periodically by the GB Government. Only applied to electricity in Northern Ireland (NI) as a relief period was provided to allow the gas market to grow. Renewables are exempt in both GB and NI. NI relief is set to expire at the end of March 2011.
Chamber Energy Alliance	the Chamber Energy Alliance is a budget portfolio deal that offers Chamber members the simplicity of a fixed contract with flexible purchasing benefits. A member opting into this product will benefit from competitive energy rates as multiple businesses come together to purchase their energy requirements as one.
Chamber Energy Helpdesk	A freephone Chamber Energy Help Desk and email service offers all Chamber members the opportunity to speak to a dedicated energy specialist.
Chamber Energy Solutions	Designed for Chamber members, in partnership with Utilitywise. Chamber Energy Solutions offers an exclusive range of products and services to reduce both energy consumption and associated cost. Through Chamber Energy Solutions every member has the opportunity to join the Chamber Energy Alliance. For the first time, members can join together, with other local and national members, in order to leverage an energy deal that delivers a competitive rate.
Ecofit	Our Ecofit team can install a range of energy saving devices and equipment into industrial and commercial properties. Our Energy Health Check, Energy Audit and the data from Edd:e will highlight a number of behavioural factors and equipment changes that will provide an energy saving. You may also have your own ideas about where energy is being wasted. We have teams of experts that can advise, devise and undertake any re-fit projects needed to realise energy savings. The Ecofit work covers all aspects of energy efficiency from simple timer switches to complete lighting refurbishments. We are N.I.C.E.I.C. approved and all installation teams hold current CRB checks.

Edd:e	gives you total visibility of energy used down to the individual circuit level, and monitors each circuit on the distribution board it is wired to. This means that you can see detailed energy use for every circuit from every distribution board in your business, 24-hours a day and 365 days a year.
Energy audit	A full review of your site, conducted by teams of qualified and accredited energy surveyors. The Energy Audit will help you begin to make practical changes to your business that will really reduce your energy consumption.
Energy Health Check	A snapshot of members' energy usage in their business. It is an estimate of your businesses energy efficiency. This uses the same methodology as the official Government Display Energy Certificate (DEC).
Fixed contract	Fixed price energy contracts have gained in popularity as prices rises continue to sky rocket and suppliers offer more and better tariffs that protect you against future price rises. Our team can offer you fixed price contracts for up to five years.
Flexible purchasing benefits	Can provide businesses with an additional opportunity in the energy market as energy (both electricity and gas) can be traded to better available prices throughout the period of the contract, or in advance of the delivery date. However, this type of procurement is not for all business and can carry more risk compared to a fixed, fully assured contract but the rewards can be significant pending business spends.
kVa supply	Available Supply Capacity (ASC): The agreed maximum supply capacity, measured in kVa, which a customer is allowed to take from the distribution system through their connection point. Customers pay a monthly charge for each unit of capacity. The maximum demand should not exceed the ASC.
Out of contract rates	Out of contract rates (OOC) apply by default when a current energy contract has expired or terminated and has not been renewed for any reason. A supplier will charge a business at a higher 'Out of Contract' tariff rate which will be applied until a business renews a contract or switches energy supplier.
Renewal rates	Our team will contact you prior to your renewal with options for renewed energy contracts.
Site amalgamation	This term is generally used when aligning all sites with one supplier ensuring contract end dates match (this may require a bridging contract), this will reduce the risk of being automatically rolled into a new contract by missing a single sites termination window.
TESLA	Tesla, our CRM system was custom designed for the Utilitywise Partner Channel by our in-house IT developers. Tesla allows Chambers to view which members we are currently working with, from initial sales call through to final sale. When you become a partner through Chamber Energy Solutions, we'll create for you a secure, password-protected Tesla account. You'll be able to log in and track the progression of your leads through the sales process. You can make sure that every opportunity to quote for business is taken, and keep an eye on which of your clients have accepted a quote.
Utility Insight	is a multi-utility web based reporting platform that gives you clear visibility into your water, gas and power usage, and helps you find ways to reduce your utility consumption.
Water bill validation	A detailed analysis of all aspects of a business's water and sewerage bills.
